

SMOKEY GREY FINISH

Manufactured weathered look

SMOKEY GREY FINISH

THE UNIQUE GREY PALETTE PROVIDES AN APPEARANCE RICH IN CHARACTER AND VERY LOW IN MAINTENANCE.

Kennedy's specialised grey solution coating is the perfect solution for clients seeking a low maintenance or greyed off appearance. The timber is supplied to give this appearance from day one of installation.

The penetrative oil with Smokey Grey tint enhances the naturally aged texture of the timber to give a pale through to darkish grey tint with occasional brown/reddish tinges.

The Smokey Grey finished timbers can be used internally where no additional coatings are required. When installed externally in exposed applications, the timber surface will continue to be enhanced and enriched in its appearance throughout the natural aging process.

When used in conjunction with high durability Class 1 timbers this provides a long term, maintenance free timber solution.
