

# TIMBER FINISHES

## TIMBER FINISHES

KENNEDY'S OFFER A COMPREHENSIVE RANGE OF TIMBER FINISHES PROVIDING A PERFECTLY TAILORED LOOK TO YOUR RESIDENTIAL OR COMMERCIAL PROJECT.

### DRESSED

When precise sizing and a clean look is required, this is the optimal finish.

This timber is profiled to tolerances according to Australian Standards AS 2796.1 producing a timber finish that is smooth to touch requiring little or no sanding.

### SAWTOOTH

The surface of the timber is "hit and miss" dressed to highlight some timber colouring and retain some of the original sawtooth markings.

Inspired by retail design fitouts this product is finding new uses in both commercial and residential applications.

### HANDBRUSHED

Kennedys unique brushing technique enhances the timber's individual patina and natural characteristics.

The finished smooth surface exposes the timber's history and can be left to age naturally or have an oil coat applied. Hand Brushed is our most popular and enduring finish.

### SMOKEY GREY

THE SMOKEY GREY FINISH PROVIDES AN ECO FRIENDLY, LOW MAINTENANCE SOLUTION, RESULTING IN A STUNNING PRE AGED LOOK.

The timber is lightly wire brushed to deepen the grain prior to being coated in Kennedy's specialised grey solution coating. The coating adheres to the surface of the timber and the timber will be weathered naturally over time.

### SAWN

This finish is produced when large timber is sawn resulting in square or rectangular cross sections.

Sizes range from standard posts and beams, primarily featured in domestic construction, through to specially requested sizes required for architectural purposes and commercial developments.

### CHARCOAL

Another popular low maintenance solution, the charcoal finish was inspired by an ancient Japanese technique originating in the 18th century.

The intent of this method is to preserve the wood by charring it with fire to weatherproof it.

A similar appearance can also be achieved with a black ash oil coating system applied.
